(DUBU)

West of the Senagi Family a group of at least four languages seems to constitute a language phylum. The languages are Jafi (170 speakers), Emumu (1100 speakers), Dubu (130 speakers) and Toweï (115 speakers). Possibly also the Nambela language south of Toweï belongs to the group, but there is no data available in this language. The phylum will be named Pauwasi Phylum after the Pauwasi river which drains the greater part of the area covered by the phylum.
