#### **(MAI BRAT)**

The Mai Brat language is spoken by approximately 21,000 people in the province of Irian Jaya, Indonesia. About 17,000 speakers are found in the three interior districts of the Bird's Head Ayamaru, Aifat and Aitinyo. There are also approximately 4000 speakers located in various coastal cities of Irian Jaya.

- Brown & Brown 1989:xiii.

... Ayamaru and Brat are other names commonly used for this language (Grimes 1948:398). ...

Voorhoeve (1975) has described Mai Brat as having nine dialects. Currently there are approximately 22,000 speakers, about 18,000 of which live around the Ayamaru Lakes. Many other Mai Brat speakers now reside in the urban areas of Sorong, Teminabuan, Manokwari, and Jayapura. At the present time we are able to distinguish four dialects of Mai Brat, generally determined by the sub-district boundaries of Ayamaru, Aitinyo, Aifat, and Mare, though this classification is by no means

definitive.

- Brown 1990:43.

Currently there are approximately 22,000 speakers of Mai Brat, about 17,000 of whom live around the Ayamaru Lakes. Many other Mai Brat speakers now reside in the urban areas of Sorong, Teminabuan, Manokwari and Jayapura. Voorhoeve (1975) has described Mai Brat as having nine dialects, although we have so far only been able to determine four. The boundaries of these four generally coincide with the subdistrict boundaries of Ayamaru, Aitinyo, Aifat and Mare.

### **(MAYBRAT)**

The different dialects of Maybrat are spoken around the following villages (the names of the dialects as given by the people themselves are given in brackets behind the place-names): Ayawasi (MayHapeh), Ayata (May-Asmaun), Fef and Senopi (MayKaron), Suswa (MayMare), Ayamaru (MayMaru), and Aitinyo (MeyTe). The dialects of Ayamaru and Aitinyo differ only very little and could hence be regarded as one dialect. In addition, lexically the dialects of Ayawasi and Ayamaru also differ only very little, but it is generally agreed by speakers of these two varieties that they do constitute different dialects, due to a

difference in suprasegmental features, such as intonation and speed of speaking.

- Dol 1996:13.

Maybrat is a Papuan language which is spoken in the central area of the Bird's Head. The total number of speakers is approximately 22,000 (Brown 1991:1). ... Maybrat is spoken in six dialects, namely Mayhapeh, Mayasmaun, Karon, Maymare, Maymaru and Mayte. Speakers of these dialects all refer to themselves as rae ro Maybrat.
