

SEGET

... kaap Sélé, in welke nabijheid tot aan de monding der Karabera de Papoewa's van den stam Sègèt wonen, die hier achter het eilandje Lagò een kampong hebben, ...

- de Clercq 1891:121.

Seget is spoken in the westernmost tip of the Bird's Head. It has obviously been influenced by its north-eastern neighbour Moi with which it shares about 50% cognates, whereas the percentages with the other members of the family lie around the family-stock level border (25% with Moraid, 28% with Kuwani, 30% with Tehit, and 34% with Kalabra).
