Some of the species listed in this index are not covered in the compendium. This is mostly because I did not have sufficient information either about the plant, or about the plant as it is grown in Papua New Guinea. Some well known plants like wheat and rye are rarely grown or used as food from local sources within Papua New Guinea.

The species listed are ones that are recorded in the literature from various sources, or are known to me.

The following species were omitted above:-

<i>Borassus heineana</i> Becc.		320
<i>Centella asiatica</i> (L.) Urban		79
<i>Ceratopteris thalictroides</i> (L.) Bronin.		329
<i>Feijoa sellowiana</i> Berg.		296
<i>Leucaena leucocephala</i> De Wit	-leucaena	359
<i>Oxalis tuberosa</i> Molina	-oka	22
<i>Ullucus tuberosus</i> Lozano	-ulluco	24
